 April through December:

April 11
May 9
June 13

July 11
August 8
September 12

October 10
November 14
December 12

Community	Obstacles	Resources
The opioid epidemic and substance use are community problems , and they will take a whole community to address it. Contact us if you would like to have a meeting in your area.	Obstacles and challenges people can face while trying to find help. We have a good understanding of the area organizations and contacts who can help.	We can help you make a connection to the right resource.
Prevention	Stigma	Harm Reduction
Interventions are available to keep kids from experimenting with drugs.	Stigma plays a critical role in the journey of addiction and recovery. Most people know someone who struggles with addiction but it's still so taboo to talk about. Let's open up the dialog.	Essential and life-saving for anyone who is actively using drugs and the people who care about them.
Support	Process of Getting Treatment	Narcan Training
R2RCNY has a team of advocates who have been through the struggles of addiction either themselves or with a loved one. As a team, we are able to assist local residents and their families find the support they need.	Where do we even begin? When you have a loved one who is suffering, who do you call? If you don't have a primary doctor you're left with the internet as your guiding light.	Each meeting will offer Narcan training and a take-home rescue kit .
